

FORMULA STUDENT XEREZ 2026

FSX IS BACK! The 1st Official Edition is Here

Following the resounding success of our Edition 0 last December, which brought together 9 teams and 6 single-seaters on track, the first official edition of Formula Student Xerez is announced for this summer.

An event designed by and for the teams, aiming to test, refine, and prepare for the season's competitions in a realistic and demanding environment that is also flexible to offer maximum versatility at the lowest possible cost.

 **Date:** July 8th to 12th

 **Location:** Circuito de Jerez - Ángel Nieto

EVENT DESCRIPTION

Technical Inspections (Scrutineering): Evaluations conducted by scrutineers with experience in official competitions. This is the perfect opportunity to pass a real initial scrutineering and receive detailed feedback before your main competitions. The Inspection Sheet will be divided into two phases:

- **Ready to Race:** Basic, essential safety points required for the single-seater to access the track.
- **Ready to Compete:** The remaining rulebook points that allow scoring in the overall FSX ranking.

Track Activity: To maximize the participants' testing time, the various dynamic events will remain operational for as long as possible, aiming for 24-hour operation. The constant opening of one or more tracks equipped with a Timekeeping system will be guaranteed.

Static Events: Each team will have an assigned slot to defend their events before judges with experience in official competitions. These events will score towards the overall FSX ranking, and feedback will be provided ahead of official events.

Real Competition Simulation: For teams seeking a full competition experience in all aspects, a Schedule with strict timings simulating an official event will be designed (including re-scrutineering slots and closed times for static and dynamic events). Combined with the open track, during a specific time slot, the first 2 runs of each driver will score for the overall ranking.

REGISTRATION AND RULES

The registration period is now open. Teams interested in formalizing their participation in Formula Student Xerez must complete the following form before **April 10th at 23:59**:

[🔗 Registration Form](#)

Note: The official event Handbook, required technical and administrative documentation, and detailed information about the Camping and Social Areas will be published soon.

COSTS AND TRANSPARENCY

As in Edition 0, the organization's main goal is to host this event at **zero cost** for the participants.

We want to be as useful as possible to the teams, not only on a technical and competitive level but also economically. However, to guarantee the viability and the best conditions for the event, there is a possibility that a symbolic payment per member/team may be required in the future. If so, this amount will be consulted in advance with the Team Leaders and broken down with total transparency through budgets and invoices before any mandatory payment is applied.
